

## Homework 10: Due Session 11

### 1. Flash Assignments:

- Add tweens and captions to your Gallery.

```
//and finally the tweening class to add a transition when the image loads  
var jpgTween:Tween = new Tween(swfLoader, "x", Elastic.easeOut, -300, 0, 3, true );  
//var myTween:Tween = new Tween (obj, prop, func, begin, finish, duration, useSeconds);
```

- Create dynamically loading Galleries for your remaining Gallery pages.
- Nesting your Gallery sections into ONE FLA may be the best user experience. Follow the directions and demo file shown in class of this arrangement.
- Publish, organize files and upload to server. Test.

### 2. Project Notebook

- **Make a list** of what's missing on your Gallery. Describe what type of navigation or other element that you want, but don't know yet how to accomplish. Keep in mind the options offered in class.
- Begin notes on what you'd like for your blog: description of content and type of audience participation. Draw a design, list what you want to show and how the audience is interacting.
